More initiative in the propagation of plants in my nursery will not be worth \$10.00 5 years from now. But plants I suggest you buy now, should be worth \$50.00 to \$100.00 in a few years. In addition, you get a lot of pleasure watching them grow. You are also doing your part in adding beauty to a troubled world.

The plants we have in stock are for sale now for landscaping, but by placing them in a nursery for a few years before planting them you will be surprised at the lovely showing they will make. Some of the cuttings, like azalea, hydrangea, etc., are amazing. These plants worth a little extra care if propagated at large specimens but with a little patience and time you can have excellent specimens from the many plants we have to offer.

These plants are shipped in boxes of 100 plants each and cost \$4.00 each postpaid. We also supply boxes, bags and envelopes and birthday presents. All plants should be grown in a box for the first year before planting in permanent place.

For Fall, we have the best quality kinds of plants than this list. Prices include packing and postage. Prices are per box and plants in bulk, low prices no order of less than \$2.00 or 100 plants. No broken box will be sent. When order calls for 5 for 50 etc., one box of 100 will be sent. Box must be ordered. 25 sold at 100 rate.

Prices are subject to change.

Please send me a list price per plant you ordered.

Using is our careful packing with soft wood and the best of Express and Parcel Post to points throughout the country. All packages are packed. Therefore, please add 10% to remainder from these prices.

The sun is a killing factor. The plants should be shaded or planted in part shade, provided either by a building or a tall evergreen. They should be elevated 4' to 5' on stakes to provide free circulation of air and a soil mixtures containing 30% good light garden loam and 50% granulated manure and 20% peat moss. Water well after planting and mulch with leaf mould or peat moss. Do not cultivate and pick weeds out by pulling. Do not allow ground to get dry, but do not wet. In case of dry ground there is a happy medium. These plants will do well in a half sun and half sun. Cut off 75% of light for first 6 weeks and then 60%.

## ALAZEA AND RARE AND UNUSUAL PLANTS.

"This list is a small part of my collection of plants. There are not surpassed in wealth of beauty. I have and I hardly think there is any more unusually in size in the different species and varieties also colors. Some colors except blue. In many, the flowers are extremely fragrant. The only plant I possess there is so general. No class of plants surpasses in color and variety. The given certain essential conditions and provided the varieties are correct, then their culture is fairly simple."

A Philadelphia collection of Azaleas and Rhododendrons is visited each year by thousands of people who marvel at the brilliant, vivid colors and profusion of bloom, which is almost unbelievable, and yet for a few dollars and a bit of patience a more extensive range of colors and varieties is available from this list.
